

## SUPPORTED LANGUAGES

• English, French, Italian, German, Spanish, Portuguese and Polish.

## SYSTEM REQUIREMENTS

• Safexs DriveSecurity runs directly on Safexs when plugged into a Windows 10, Windows 8.1, Windows 7, Windows Vista® or Windows XP computer.

## STORAGE SPACE

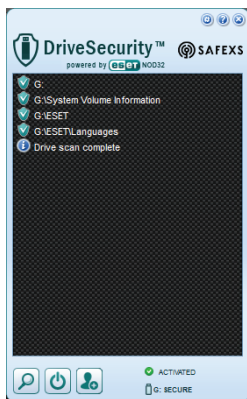

• DriveSecurity needs approximately 300 MB of space on your Safexs device.

## SUPPORTED DRIVES

• Safexs DriveSecurity is already installed on Safexs Protector and Safexs Protector XT drives and comes with 1 year free ESET Antivirus scanner and virus definition updates, a standalone version is also available for SafeXs 2.0, SafeXs FIPS, SafeXs 3.0 and SafeXs 3.0 XT drives.

## LICENSING

• Safexs DriveSecurity can be purchased in 1, 2, 3 and 5 year licences.

## BENEFITS

Easy to deploy - Safexs DriveSecurity automatically activates its licence on Safexs Protector 3.0 & Safexs Protector XT drives when the drive is first initialised by the end user and the EULA is accepted, for manually activation on other Safexs drives, you will need to add a licence key which can be purchased through a Safexs partner.

**NO ADMIN RIGHTS |**  
No administrator privilege is necessary.

**NO AV CONFLICTS |** Safexs drive security doesn't interfere with the computer's own antivirus.

**FAST & ACCURATE |** Heuristic malware detection in a small portable application that prevents against known and unknown threats even without up-to-date virus signatures.

**HOURLY CHECKS |** Virus signature definition's are checked hourly and automatically updated when an internet connection is available.

**INFECTED FILES DELETED |** When a virus is detected, the infected file is deleted and the user is notified.

PLEASE NOTE: When Safexs DriveSecurity is used in a corporate environment, you may need to set exceptions for proxy settings, firewalls, whitelisting etc.

\* DriveSecurity™ powered by ESET is based on the ClevX DriveSecurity technology licensed from ClevX, LLC.

# Protect your Safexs drive and computer from malware infection, with ESET NOD32® antivirus engine.

Safexs DriveSecurity™ \* (by ClevX™) is a powerful antivirus tool that prevents malware from spreading through Safexs secure USB drives. Designed for users who transfer sensitive information, pictures, music, videos and other documents via Safexs, Safexs DriveSecurity ensures the files that you put on your drive are malware-free.

Safexs DriveSecurity eliminates all types of threats, including viruses, rootkits, worms and spyware from your Safexs USB drive. More importantly, it protects you from inadvertently spreading malware to your home, office or shared computers.

## PROTECTED BY THE BEST

Safexs DriveSecurity is powered by the award-winning ESET NOD32® antivirus engine. The engine scans any changes to the drive's content for viruses, spyware, trojans, worms, rootkits, adware and other Internet-borne threats. When the drive owner authenticates to Safexs, DriveSecurity launches immediately. It updates its virus signature and scans any changes (all new files, applications etc.) to the safexs drive. Upon user request, it checks the entire flash drive to ensure that it is free of malicious code. It stands as a barrier to protect the drive from being compromised by viruses resident on the host PC.

ABOUT CTWO PRODUCTS AB - A market leader in a providing customised USB and encryption solutions out of its head office in Malmo, Sweden. Safexs has been deployed worldwide to government agencies, healthcare, education and corporates.
